LED Light

1 Light 45 mins 75.00
Light Therapy Facial 92.00

Noticeably smooth away wrinkles, pigmentation, acne, eczema and more at the speed of light! LED Light produces amazing results with no harmful effects. A simple colour light-energising facial is non-invasive and relaxing, while it nourishes every cell. The range of its effects, even at its simplest application, may surprise you. Light can stimulate the cells' ability to find balance or to re-regulate them-selves, resulting in cellular regeneration and, dare we say, 'younger cells'. 'Young' skin cells have the energy they need to repair and rejuvenate quickly, but as we age, their cellular energy depletes, cell turnover slows down and the skin no longer fixes itself as efficiently as it once did.
